October 1st, 1945

To His Excellency Sam C. Ford Governor of the State of Montana Helena, Montana

Dear Governor Ford:

Pursuant to the requirement of the Workmen's Compensation Act of Montana, we have the honor to transmit herewith our Thirtieth Annual Report covering the administration of the Workmen's Compensation Act by the Industrial Accident Board of the State of Montana, for the twelve month period ending June 30th, 1945.

The Industrial Accident Fund (State Fund) has increased itstotal cash and invested funds from \$1,968,775.41 to \$2,535,380.09. The sharp increase in the total reserve of the Industrial Accident and Industrial Reserve Funds comes about by reason of the increased premium payments which are largely due to higher wages in all industries.

The total future compensation payments which are fixed and estimated, equals, in the opinion of the Board, a total sum of \$1,186,940.00. This is approximately \$109,000.00 less than our estimate of total liabilities, which was made for June 30th, 1944. This would make it appear that our premium rates had been fixed at a figure which would bring in revenue more than enough to take care of the future liabilities of the fund.

In view of this the Board adjusted the premium rates in a large number of classifications under Plan Three of the Workmen's Compensation Act of Montana, and in some instances made a sharp reduction. These new rates became effective November 1st, 1945, and as time passes the Board feels quite certain that the total reserve monies will not increase to any appreciable extent, while we anticipate that our liabilities the next three years will increase. This will mean that the condition of the Industrial Accident Fund will be adjusted to about what is proper for the number of workmen who will be employed in the various industries in Montana during the next few years.

> Respectfully submitted, INDUSTRIAL ACCIDENT BOARD

COAL MINE INSPECTOR'S REPORT

In accordance with the provisions of the State Mining Laws, I herewith submit my report as State Coal Mine Inspector for the fiscal year ending June 30, 1945.

GENERAL CONDITION OF INDUSTRY

The demand for coal due to war time requirements was maintained throughout the year, and with the miner's work day lengthened to nine hours, increased production resulted. It is gratifying to report, that notwithstanding the increased production, the fatality rate is the lowest in our history.

AMENDED MINING LAWS

At the last State Legislative Session, the State Mining Laws were amended and brought up to date, and their strict enforcement will ensure that no large scale mining disasters will occur in the future.

FIRST AID AND MINE RESCUE WORK

Many of the employees of our large mines have received First Aid Training, and crews have been trained in Mine Rescue work by U. S. Bureau of Mines officials. Every effort will be made to maintain interest in these activities, which have for their purpose, the reduction of the number of accidents which occur in and around our coal mines.

MINE SAFETY MEN

At several of our mines the employees have selected "Mine Safety Men", and one of their duties is to accompany the State Mine Inspector during his inspection of their respective mines. This has resulted in greater attention being given to hazardous practices by the mine officials and the employees, with the result that many have been eliminated by mutual agreement. The "Mine Safety Men" are herewith commended for their work.

OTHER COOPER. TION RECEIVED

Close cooperation exists between the District President of the United Mine Workers of America, W. A. Boyle, the State Coal Mine Inspector and Mr. E. L. Christensen, Federal Coal Mine Inspector for the State of Montona. Many of the major recommendations of the U. S. Bureau of Mines, and those of some of their inspectors, are now embodied in our State Mining Laws. The cooperation received from the persons names above, is hereby acknowledged with thanks and appreciation.

MINE INSPECTOR'S REPORT - CONTINUED

STATISTICS OF THE INDUSTRY

Number of tons of coal produced	4,104,767
Value of coal at the mines	127,480.00
Lbs of dynamite used	1,854,642
Lbs of Black powder used	229,005
Lbs of permissable powder used	209,313
Number of men employed	1,304
Number of days worked (average)	291
Number of mines reporting	35
Estimated tonnage mined by machine	99%
Estimated tonnege mined by hand	1%
Number of fatal accidents.	1

Respectfully submitted,

Edward Davies State Coal Mine Inspector

QUARTZ MINE INSPECTOR'S REPORT

In submitting the annual report as metal mines inspector for the district assigned, for the fiscal year ending June 30, 1945, the undersigned respectfully reports as follows:

All the principal mines in the territory assigned, were inspected with regard to safety conditions. Suggestions for the betterment of conditions were promptly put into effect.

The metal mines have operated through the year hampered by a shortage of labor, but despite this handicap, have delivered a large tonnage of essential material for the nation's needs.

With the war ended and restrictions, which were in vogue, now lifted, mining activity, especially in the gold and silver producing areas will increase materially.

The U. S. Bureau of Mines, suffering from a reduction in appropriations, is being forced to cut its personnel. This is unfortunate, as this agency has been of immense benefit in making surveys of all the branches of the mining industry, notably so, from the health and safety standpoint, of which this State Department is principally concerned.

The legislative appropriation of \$25,000.00 a year for the ensuing two years to the State Bureau of Mines and Geology, makes possible the embarking on a much needed program by the bureau, which intends to publish geologic reports on the mining district of Montana. These reports will cover deposits of lode, placer, non-metalic, oil and gas, coal and ground water. The reports will give great aid to the prospector, as will the technical advice available through the bureau, with relation to ore dressing and other related problems.

Respectfully submitted,

Ben Henry State Quartz Mine Inspector

QUARTZ MINE INSPECTOR'S REPORT

I inspected all the operating mines in the district for the year ending June 30, 1945.

I found that Safety conditions are being given due consideration by all concerned, and suggestions for Safety are given immediate attention.

The fatal accidents for the year have decreased very much from the preceding year, which is very good proof that everybody concerned is taking an interest in Safety First, but room for improvement still remains especially in the falling ground accidents.

I hereby submit a list of fatal accidents for the year ending June 30, 1945:

Falling ground7Falling pipe1Hit by car1Freeing chute1Falling on pinch bar1

Respectfully submitted,

Dennis Murphy State Quartz Mine Inspector

SAFETY INSPECTION DEPARTMENT

The work of making safety inspections of places of employment in hazardous occupations, including metal mines, coal mines and boilers, has been carried on during the fiscal year by the following persons:

Boiler Inspector;	C. A. Johnson Pat Whalen John Gilbert
Safety Inspector:	Jess Rawls
Quartz Mines Inspectors:	Ben Henry Dennis Murphy
Coal Mine Inspector:	Edward Davies

The following table shows the result of the inspectors' work and the fees collected for inspections:

WORK OF SAFETY BUREAU FOR YEAR 1944-1945 (Fiscal Year July 1, 1944 to June 30, 1945)
